Consultations

SKIN ANALYSIS

To help you look your best we need a complete understanding of your skin's condition. We love the Observ 520, a diagnostic Imaging processor which takes a series of six detailed photographs of your face using different types of light and filters. It's an incredibly powerful tool in providing a detailed diagnosis of your skin health, making it the perfect launchpad for a personalised skin care and treatment plan.

	Time	Price
Observ 520 Diagnostic Imaging	30 mins	\$75*

*Fully redeemable on all skincare products and selected services offered at the clinic.

SKIN CHECK

Are you due for a skin check? Have you seen something on your skin that worries you or someone in your family has had a skin cancer? At the Skin Lab we highly recommend a yearly skin check as part of your skincare routine. To make it simple, our Medical Director operates this service from The Skin Lab Clinic, and bookings can be made via our booking team.

	Time	Price
The Skin Lab Skin Check - New Patients	30 mins	\$145*
The Skin Lab Skin Check - Existing Patients	15 mins	\$105*

*Medicare rebates are available for this service.

SKIN BETTER SCIENCE ALPHARET® PEEL

Skin Better Science was founded by the legendary Jonah Shacknai, famous for introducing AHAs into skincare products. For his Skin Better Science range he has created Alpharet®, a unique combination of an alpha hydroxy acid (AHA) and a retinoid that leaves the skin looking rejuvenated. It improves overall skin tone, texture and early signs of ageing or blemishes. This deeper peel harnesses the power of Alpharet® in two different strengths to help you achieve maximum results.

DERMAPLANING

Dermaplaning also known as Dermablading or epi-blading is a highly effective physical exfoliation treatment that provides instant results without the use of chemicals. It is a simple and safe manual technique for exfoliating the skin while removing fine vellus hair, also called 'peach fuzz'. The procedure involves using a small, modified surgical blade to VERY gently exfoliate and epilate the surface, with light feathery strokes, leaving the skin smooth and vibrant.

Cosmetic Injectables

COSMETIC INJECTABLES

We offer a range of cosmetic injectable skin treatments to help you achieve your aesthetic goals. An appointment with the Medical Director is required for all treatments listed below. Both appointment and consultation are on site here at The Skin Lab Clinic. During your consultation we will discuss your treatment options, including the brands we use and why we use them.

ANTI-WRINKLE INJECTIONS

Anti-wrinkle injections help to soften & relax fine lines. We will have you looking fresh, youthful and natural.*

Pricing guide*	Units	Price
Frown Lines	40 units	\$280
Crows Feet	40 units	\$280
Forehead Lines	20 units	\$140
Upper Lip Lines	5 units	\$35
Excessive Sweating (Armpits)	200 units	\$1000

*The unit and pricing structure is based on the use of one particular brand. Should you wish to use a different brand, the units required will change, however pricing will remain consistent. Any variation in price will be discussed with you during your consultation and prior to treatment.

SILHOUETTE SOFT THREAD LIFTS

Innovative procedure, with a double tightening and regenerating effect, aiming to lift and tighten the skin of the face & neck. It is particularly beneficial for the improvement in sagging of tissue in the cheek, around the mouth and in the jaw, and increasing collagen production in the skin. Ever stood in front of the mirror and pulled your cheeks back towards your ears? Does it look better? If yes, then this treatment is for you?

DERMAL FILLERS

Fillers are used for the correction of volume which we tend to lose as we age. Fillers help with facial lines and enhancement of specific facial features such as the lip, chin or cheeks. We pride ourselves on achieving natural, fresh results. As every face is different, we will tailor the treatment and its price to your specific needs, during your consultation. The below, however, is a reasonably accurate pricing guide.

IPL Skin Rejuvenation

IPL PHOTO REJUVENATION

The Intense Pulse Light (IPL) system delivers the precise amount of light energy to the skin, which means that collagen production is stimulated while causing blood vessels under the skin to contract. This is a treatment that is used to treat a variety of benign skin conditions, such as photo damage, broken capillaries, pigmentation, or other blemishes. Our staff are trained in the most advanced systems for IPL Rejuvenation.

Laser Skin Rejuvenation

CUTERA ENLIGHTEN III & THE CUTERA XL V+ LASERS

We proudly use Cutera laser technology, led by the state-of-the-art Cutera Enlighten III and the Cutera XL V+. We use laser skin rejuvenation to treat a huge list of troublesome skin conditions. Discoloration, melasma, pigmentation, uneven skin tone, sun-damaged skin, fine lines and wrinkles, enlarged pores, acne scarring, age spots and sunspots and even the loss of elasticity. The team here may draw upon a selection of treatments listed below as well as the combined use of these different laser technologies to achieve your desired result.**

LASER GENESIS SKIN REJUVENATION

Promotes healthy, vibrant looking skin in both men and women by stimulating the natural processes in the skin to increase collagen production and close small blood vessels causing diffuse redness. Over three to five treatments pore size is reduced, diffuse redness is reduced, and skin appears plumper and more youthful. It also reduces the appearance of fine lines and wrinkles.

Bye, bye ink

LASER TATTOO REMOVAL

Say goodbye to the ink faster and quicker than ever before.

Powered by science- backed tattoo removal innovations, The Cutura Enlighten III laser uses the latest technology to remove ink colours by delivering ultra-short picosecond pulses of energy into the skin. This Pico technology is the key to breaking down all types of tattoo inks and colours. Our tattoo removal is FAST so therefore much more comfortable for our clients. In many cases only half the number of treatments are needed.

Tattoos come in all shapes, sizes and colours. This makes it difficult to give an exact quote for the removal of a tattoo without seeing it first. We kindly ask you to make a consultation to speak with a member of our team who can measure you up and give you a personalised quote. We can also discuss any payment plan options if required. All of this can be done in person at the clinic or via secure video conferencing from the comfort of your home.

MICROSCLEROTHERAPY

A relatively quick, inexpensive and simple procedure, Microsclerotherapy involves injecting a liquid called sclerosant into the spider veins using a very fine needle. It has an effect on the walls of the veins, causing them to close and fade away gradually over a 6 week period. Clients experience minimal discomfort and can resume normal daily activities. Each injection treats a small area, meaning multiple injections may be required depending on the extent of the vessels.
